## MITEC TELECOM COMPLETES ACQUISITION OF KERAGIS CORPORATION

**Montreal, September 25, 2007** - As first reported on August 15, 2007, Mitec Telecom Inc. has completed the acquisition of California-based Keragis Corporation, a producer of unique, next-generation amplifier solutions for commercial and military communications and radar systems.

"We would like to welcome the Keragis team to Mitec and look forward to a productive relationship", said Mitec President and CEO Dan Piergentili. "Keragis' patent-pending technology combined with Mitec's broad VSAT satellite terminal portfolio and manufacturing capabilities will result in an extensive product offering to key US system integrators such as Raytheon, Harris and General Dynamics. It will also allow to offer products directly to the US Department of Defense," he continued.

Keragis' patent-pending design permits the integration of amplifiers into compact structures with very high efficiencies. This will give Mitec the ability to design high power amplifiers in smaller and lighter packages, a key factor in radar and VSAT systems.

The transaction having been completed, Keragis President, Robert Rector, will be appointed as Chief Technology Officer at Mitec Telecom and will be nominated to join Mitec's Board of Directors at its annual shareholders meeting to be held on October 19, 2007.

### **About Mitec Telecom**

Mitec Telecom is a leading designer and provider of radio frequency (RF) products for the telecommunications and satellite communications industries, as well as a variety of other sectors. The Company sells its products worldwide to network providers for incorporation into high-performing wireless networks used in voice and data/internet communications. Headquartered in Montreal, Canada, the Company also operates a facility in China. Mitec Telecom Inc. is listed on the Toronto Stock Exchange under the symbol MTM. On-line information about Mitec is available at [www.mitectelecom.com](http://www.mitectelecom.com).

### **About Keragis Corporation**

Founded in 1995, Keragis Corporation specializes in producing state of the art high efficiency solid-state amplifiers that solve unique system requirements. Keragis' mission is to make available to the commercial and military market extraordinary capability in the design and production of high performance solid-state power amplifier subsystems. Corporate offices are located in Poway, California and on-line information is available at [www.keragis.com](http://www.keragis.com).

Except for historical information provided herein, this press release may contain information and statements of a forward-looking nature concerning the future performance of the Company. These statements are based on suppositions and uncertainties as well as on management's best possible evaluation of future events. Such factors may include, without excluding other considerations, fluctuations in quarterly results, evolution in customer demand for the Company's products and services, the impact of price pressures exerted by competitors, and general market trends or economic changes. As a result, readers are advised that actual results may differ from expected results.
