MITEC RECEIVES NEW VSAT ORDER

Montreal, March 5, 2008 - Mitec Telecom (TSX: MTM) announced today that it has received a second order from a major cellular network operator in Africa to provide its Very Small Aperture Satellite Terminal component, also known as a VSAT Block Upconverter.

In January, Mitec initiated deliveries on the first phase of an order for this network operator. A second order reinforces the company's position as a leading provider of 2-way satellite communications for growth markets. Talks are now underway to provide this customer with Mitec's mobile wireless infrastructure products to enable concurrent build-out of the mobile subscriber network in the same regions of Africa.

"As we continue to leverage our relationships with cellular operators that have undertaken network expansion projects, we are seeing opportunities to provide solutions that combine products from both our satellite communication and mobile wireless infrastructure portfolios," said Robert Mitchell, Vice-President, Global Marketing and Sales. "One of the elements that differentiates Mitec from other telecom suppliers is our ability to offer customers a range of solutions which they would have traditionally had to source from multiple suppliers."

"We are very pleased with the interest that Mitec's products are receiving from companies in Africa, South America and Asia as these regions continue to focus on VSAT technology to build out their communications networks," said Daniel Piergentili, Mitec's Chief Executive Officer. "It's an exciting time for Mitec as we are in a position to facilitate new opportunities both by manufacturing and delivering custom-engineered solutions and through the use of proven off-the-shelf technology."

Development and manufacturing will take place at Mitec's Montreal facility as well as in Suzhou, China. Deliveries are expected over the next several months.

About Mitec Telecom

Mitec Telecom is a leading designer and provider of radio frequency (RF) products for the telecommunications and satellite communications industries, as well as a variety of other sectors. The Company sells its products worldwide to network providers for incorporation into high-performing wireless networks used in voice and data/internet communications. Headquartered in Montreal, Canada, the Company also operates a facility in China. Mitec Telecom Inc. is listed on the Toronto Stock Exchange under the symbol MTM. On-line information about Mitec is available at www.mitectelecom.com.

Please note: Mitec is generally not able to disclose the names of its major customers or transaction financial data in press releases due to confidentiality provisions that prevent the release of its customers' sensitive competitive information.
