MITEC RECEIVES \$1.5 MILLION NETWORK EQUIPMENT CONTRACT

Montreal, July 15, 2010 - Mitec Telecom Inc. ("Mitec") (TSX: MTM), a leading designer and manufacturer of mobile wireless, fixed wireless, broadcast and satellite components announced today that it has received an order worth approximately \$1.5 million to support a European telecom provider's network upgrade.

The contract is for duplexer low noise amplifiers ("DLNA") relating to a GSM network upgrade. DLNAs, which are a core product line for Mitec, are considered to be a key base station component for cellular networks since mobile phone users want to communicate in a form that resembles natural conversation as much as possible. This solution separates uplink and downlink signals between the mobile subscriber and the cellular base station while amplifying the low power signal from the subscribers handset.

When operators wish to add additional network capacity to service the growing wireless market, they make use of wider-band GSM standards but it is often necessary for them to update their radio frequency equipment. Mitec addresses this mobile wireless market need with a host of products in its coverage solution product line aimed at upgrading base stations to increase the capacity of existing networks.

"We are pleased that large telecom equipment providers continue to use Mitec as their preferred vendor for this application, considering the amount of competition in this space", commented Dan Piergentili, Mitec's President and CEO. "This contract also provides further evidence that telecom operators are spending capital dollars again", he said.

The equipment will be manufactured at the Corporation's Suzhou, China facility and delivered in the second quarter of Mitec's fiscal year.

About Mitec Telecom Inc.

Mitec is a leading designer and provider of radio frequency (RF) products for the telecommunications and satellite communications industries, as well as a variety of other sectors. Mitec sells its products worldwide to network providers for incorporation into high-performing wireless networks used in voice and data/internet communications. Headquartered in Montreal, Canada, Mitec also operates facilities in California and China. Mitec is listed on the Toronto Stock Exchange under the symbol MTM. On-line information about Mitec is available at www.mitectelecom.com.

Due to confidentiality provisions, Mitec is generally not able to disclose the names of its major customers or the financial data related to sales transactions. Certain statements in this release, including statements regarding future results and performance, are forward-looking statements based on current expectations. The accuracy of such statements is subject to a number of risks, uncertainties and assumptions that may cause actual results to differ materially from those projected, including, but not limited to, the effect of general economic conditions, decreases in demand for Mitec's products, fluctuations in selling prices and adverse changes in general market and industry conditions and other factors listed in Mitec's public filings with the appropriate securities regulatory authorities.
